<https://github.com/stivin-00>

WORK EXPERIENCE

Bookishmate

Volunteer, internship | Software developer intern
Lagos , Nigeria
2022-12-01 | Currently working here

We are build an educational app, using react and react native for frontend, nodejs, Express for the backend, MongoDB for the database, nodemailer for emails. We use git/github.com for version control and collaboration. Paystack for payment.

My responsibility as an inter is to convert Figma prototypes/wireframes to front-end codes. After each task, I report to the senior developers.

Balm Technologies

Entry level | software developer
Lagos , Nigeria
2022-03-01 | Currently working here

Building and maintaining a healthcare marketplace start-up.

product is built with react js frontend, MongoDB database node/express backend.
I lead the front-end team.

I collaborate with other team members (full-stack also) on building the product.

my responsibility as the frontend lead is building and testing reactjs components, defining the client-side architecture, merging other frontend developers' commits, and pushing the final code to production. as a full-stack developer, I also contribute to the server code.
